Phishing attacks - 5 weeks trend

This is a sample report generated from the Risk Recon - CyGuard Email and Cloud Collaboration Tools Assessment based on a real company. The actual names and designations have been replaced to protect the company's privacy.

The information above shows various phishing emails passing through the organization's existing email security.

Digital Hands' Email & Cloud Collaboration Tools Security solution can be installed in just a few clicks with no need for an overhaul of your current Microsoft 365 or Google Workspace setup.

The result is a quick, secure, and cost-effective solution that will provide the most advanced protection on the market.

Sign up for a **FREE** two-week trial to get started.
